m|devices®

We believe in effortless performance, so you can focus on caregiving.

One size never fits all. For over a decade we've been designing and manufacturing devices that simplify the roles of clinicians and carers – not just cut to a standard specification but tailored to the unique needs of Australians.

Our focus is on making performance effortless, leaving you free to focus on what matters most – caring for patients.

Leading by Design is a philosophy that reflects our commitment to research and collaboration. A crucial part of our success has been our effort to embed medical professionals in the design process. Their insight helps inform solutions that make the giving of care simple and rewarding.

The problems you face today are the solutions we're working towards for tomorrow.

CONTINENCE
CARE

Accessible, reliable and simple to use

The treatment of acute and chronic urinary disorders affects many groups in our community and is often an invasive and confronting process for the patient.

As care givers and clinicians, you need the reliability and performance that comes from solutions carefully tailored to your needs, enabling you to perform at your best and assure comfort and confidence for those in your care.

Our range of catheters and accessories are designed to simplify the care giving process, putting you in control of a reassuring, patient-centred experience that minimises discomfort.

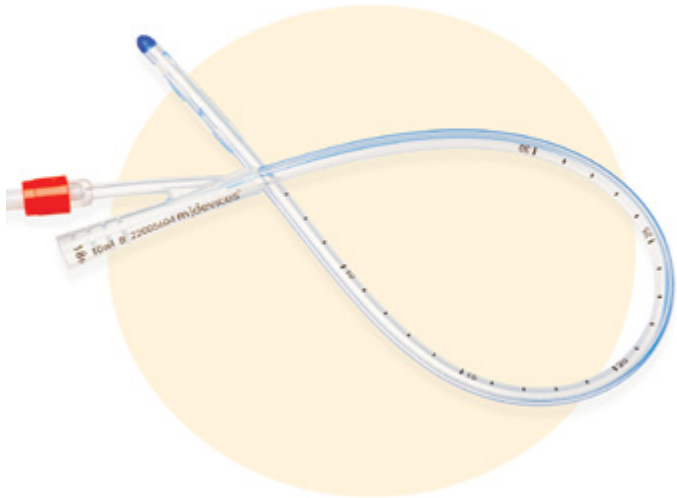

Catheters

Our catheters are designed to support your full range of acute and chronic care needs.

Available in paediatric, female and male sizes, each colour coded product has been developed to simplify product selection, maximise patient comfort and support an intuitive, confident insertion.

2-Way Foley Catheters

Approved for both urethral and suprapubic catheterisation, our 2-Way Foley is made from 100% medical grade translucent and flexible silicone. A symmetrical balloon design supports reliable positioning and minimises the potential for ridging.

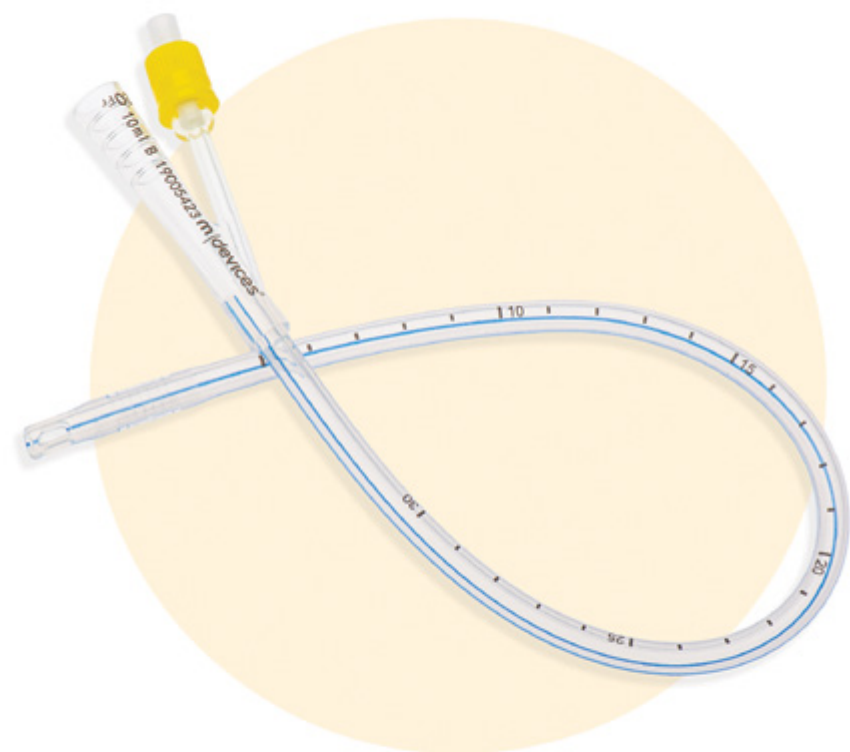

- ⊗ 100% Silicone
- ⊗ Three lengths available: Paediatric 33cm, Female 23cm and Standard 45cm
- ⊗ Intended for urethral and SPC use
- ⊗ Long indwelling time of up to 8 weeks*
- ⊗ Colour coded for easy size identification
- ⊗ Symmetrical balloon ensures reliable positioning
- ⊗ Radiopaque
- ⊗ Standard length codes have printed high contrast incremental markings from 6cm to 30cm

* As per laboratory-based testing results and validation against requirements ISO 20696.

2-Way Foley Catheters (Open-Ended)

With its open-ended design and bilateral eyelets this Foley is designed to deliver the high flow rates for urine drainage necessary to support patients with a strong tendency for catheter blockages.

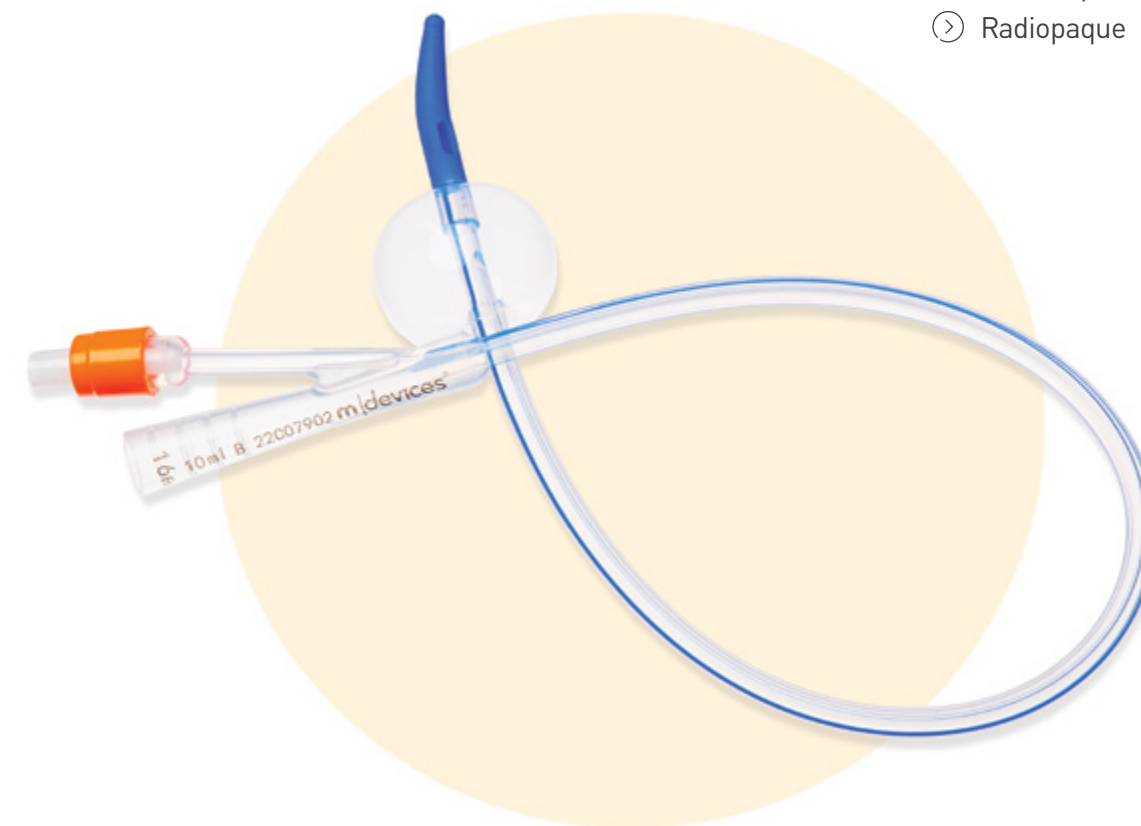

- 100% Silicone
- Short tip to reduce bladder irritation
- Open ended with two bilateral eyelets to improve flow
- Suitable for both males and females
- Symmetrical balloon ensures reliable positioning
- Intended for urethral and SPC use
- Colour coded for easy size identification
- Radiopaque
- Measurement for catheter placement

Where confidence meets care.

Our focus is on making performance effortless, leaving you free to focus on what matters most – caring for patients.

Nelaton Catheters

Our Nelaton Catheters are intended for intermittent bladder catheterisation. They are made from medical grade thermo-sensitive plastic and offer a perfectly finished distal end for smooth insertion. The blue coloured holding sleeve assists to maintain aseptic technique during insertion.

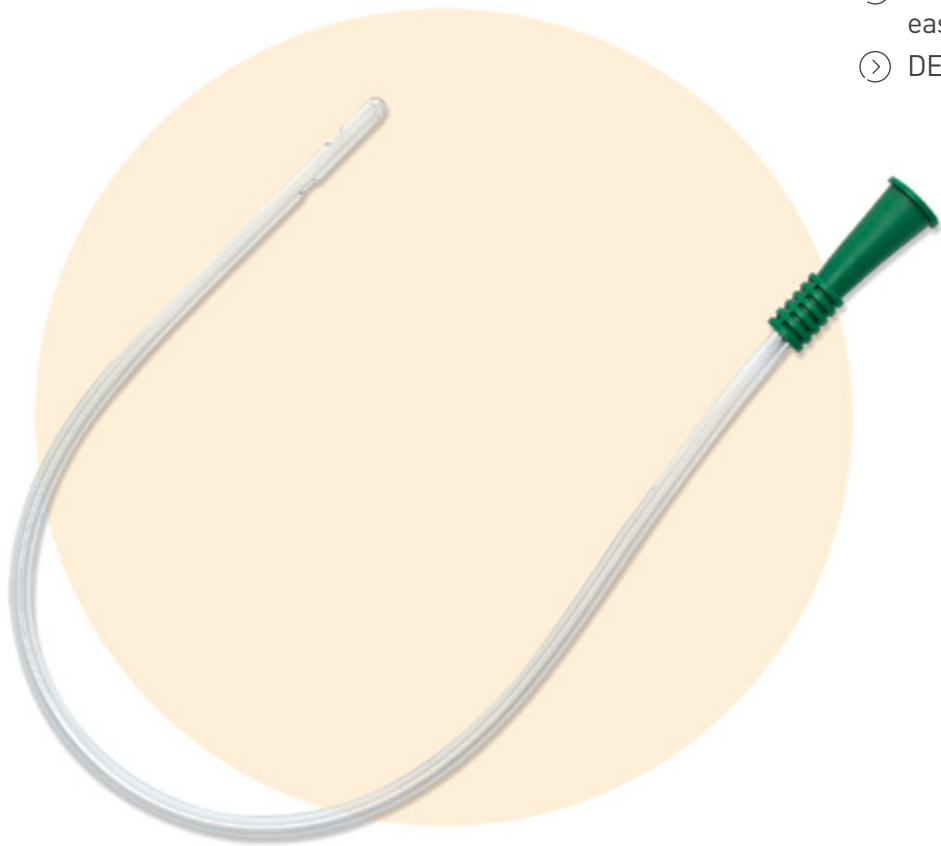

- ⌕ Available in male, female and paediatric lengths
- ⌕ Smooth distal end aids insertion
- ⌕ Colour-coded to support easy size identification
- ⌕ Holding sleeve to maintain aseptic technique during insertion

Nelaton Catheters (Hydrophilic Coated)

Our Hydrophilic catheters are made from non-toxic DEHP free PVC. Their smooth water soluble polymer coating combined with a heat polished distal tip supports a smooth insertion without the need of lubricants.

- ⌕ Available in male, female and paediatric lengths
- ⌕ Heat polished distal end aids insertion
- ⌕ Hydrophilic coating supports lubricant free insertion
- ⌕ Colour coded to support easy size identification
- ⌕ DEHP free

Intermittent Closed Catheterisation System

Our Closed Catheterisation System is sterile and pre-lubricated with a hydrophilic gel, so no additional preparation is needed. The system works like a traditional Nelaton Catheter and provides a simple catheterisation that reduces the risk of urinary tract infections.

- ⌕ Integrated 1500mL bag
- ⌕ Sterile closed system reduces the chance of infection
- ⌕ Pre-lubricated for simple insertion
- ⌕ DEHP, BPA and latex free

Designed for medical professionals, by medical professionals.

We know from experience that by observing, listening and collaborating with the right people we can find performance breakthroughs with the potential to transform how you work.

Urine Bags

Our Urine Bags are available with and without a non-return valve and variations in tube length ensure the bag is optimised for different settings.

- ⌵ Clear volume graduation to aid simple volume measurement
- ⌵ Varying tube lengths to support different patient needs
- ⌵ Made from latex-free, durable material to deliver confidence

Drainage Bags

Our drainage bags are designed to be unobtrusive and minimise the risk of unwanted spills providing confidence and security for your patients.

We provide a range of different urine bags to suit lifestyle needs and the care context. We also offer a double and triple chamber integrated meter to simplify the monitoring of urine flow.

Universal Securement Device

Our Universal Securement Device is designed to optimise the securement of indwelling catheters while ensuring patient comfort. An adhesive strip fastener and soft material tabs provide two levels of securement to ensure the catheter stays in place.

- ⌵ Maximise patient comfort
- ⌵ Two levels of securement to avoid sliding and dislodgement
- ⌵ Low irritant adhesive dressing is soft and comfortable on the skin
- ⌵ Re-adjustable soft material tabs
- ⌵ Simple to apply and remove

Accessories

Securement of the catheters and drainage bags is a critical aspect of continence care.

We have designed a range of products to simplify securement and ensure bags and catheters perform optimally.
