Products

m|devices[®]

We believe in effortless performance, so you can focus on caregiving.

One size never fits all. For over a decade we've been designing and manufacturing devices that simplify the roles of clinicians and carers – not just cut to a standard specification but tailored to the unique needs of Australians.

Our focus is on making performance effortless, leaving you free to focus on what matters most – caring for patients.

Leading by Design is a philosophy that reflects our commitment to research and collaboration. A crucial part of our success has been our effort to embed medical professionals in the design process. Their insight helps inform solutions that make the giving of care simple and rewarding.

The problems you face today are the solutions we're working towards for tomorrow.

AIRWAY MANAGEMENT

Safe, reliable and simple to use

In acute care settings you demand the reliability and performance that comes from solutions carefully tailored to your needs.

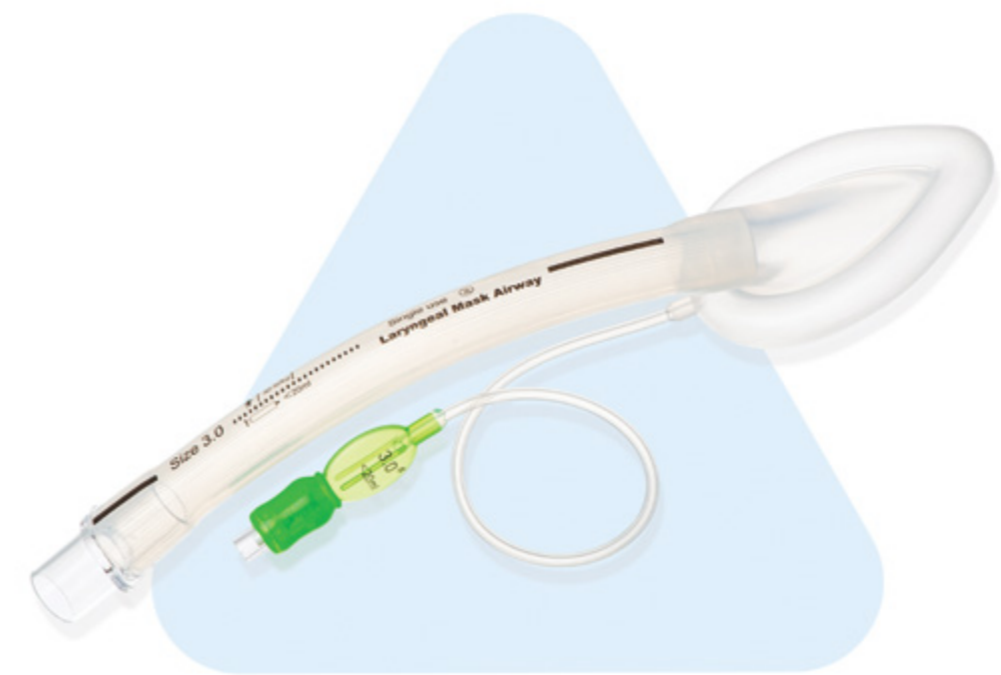

Our Airway Management and respiratory support products allow for the simple, safe and reliable achievement and maintenance of airways, the control of fluids and the provision of supplemental oxygen. Our products enable you to maximise patient wellbeing and comfort.

Laryngeal Mask Airways

A smooth one-piece design allows for easy insertion and guide markings on the handle assist with positioning. The translucent tubing provides clear visibility. The soft-seal cuff reduces pressure and minimises potential trauma. Our masks also feature a 15mm connector and pilot balloon to control the cuff.

- ⊗ One-piece design for easy insertion
- ⊗ Clear guide markers for easy positioning
- ⊗ Soft seal cuff to reduce pressure
- ⊗ Pilot balloon to aid visual and tactile assessment of cuff
- ⊗ 100% medical grade silicone
- ⊗ Translucent tubing for clear visual monitoring
- ⊗ Available in adult, paediatric and neonate sizes
- ⊗ Colour coded for simple size selection

Intubation

Our full range of intubation devices simplify and reliably support the creation of a viable airway for anaesthesia.

Each product has been carefully considered and designed to aid effective selection, insertion, placement and ongoing management of the airway.

Refer to our website at www.mdevices.com.au for current stock information

Laryngeal Mask Airways (Reinforced)

Our smooth one-piece design allows for easy insertion and the guide markings assist with positioning. Any condensation, blood secretions and regurgitated gastric contents are easily visualised through the translucent tubing. Reinforced tubing reduces kinking and supports more complex intubation.

- ⊗ Reinforced tube for difficult intubations
- ⊗ Available in adult, paediatric and neonate versions
- ⊗ Colour coded for simple size selection
- ⊗ Clear guide markers for easy positioning
- ⊗ Soft seal cuff reduces pressure and minimises potential trauma
- ⊗ A pilot balloon allows for visual and tactile assessment of the inflated / deflated cuff
- ⊗ 100% medical grade silicone
- ⊗ Translucent tubing for clear visual monitoring

Endotracheal Tubes (Cuffed)

Our Endotracheal Tube has a high volume low pressure cuff. A beveled tip and one-piece design allows for easier insertion through the vocal cords and clear guide markers support an effective positioning. In instances where the tip edge opening makes contact with the tracheal wall and occludes the tube, the Murphy Eye design provides an alternative gas passage.

- ⊗ Large range of sizes
- ⊗ Murphy Eye design provides an alternate gas passage
- ⊗ Radio opaque line for X-ray visualisation
- ⊗ Non-toxic PVC design
- ⊗ High volume cuff ensures positive pressure wall seal
- ⊗ Clear guide markings for easy positioning
- ⊗ Oral/nasal

Anaesthetic Cushioned Masks

Our Anaesthetic Masks are made from a highly transparent, non-toxic soft PVC ensuring a comfortable facial cushion and an optimal air seal with the patients face. A colour coding system aids product selection and an inflation valve supports efficient and easy inflation and deflation. Children's masks are sweetly scented to promote calm and ease fear and anxiety.

- ⊗ Colour coded to aid product selection
- ⊗ Easy grip design
- ⊗ Facial cushion provides a strong seal
- ⊗ Children's masks are sweetly scented

Oxygen Masks

Our Oxygen Masks are made from non-toxic medical grade PVC and are available with and without tubing.

- ⊗ Adjustable strap
- ⊗ Adjustable nose clip
- ⊗ Kink resistant star lumen tubing
- ⊗ Paediatric and adult versions
- ⊗ Up to five-year shelf life
- ⊗ Available in no rebreathing versions with a Reservoir Bag

Oxygen Therapy

Our Oxygen Therapy solutions are designed to deliver supplemental oxygen across a wide range of clinical settings.

Designed to aid simple and safe administration of oxygen therapy to treat hypoxemia and provide breathing myocardial support.

Designed for medical professionals, by medical professionals.

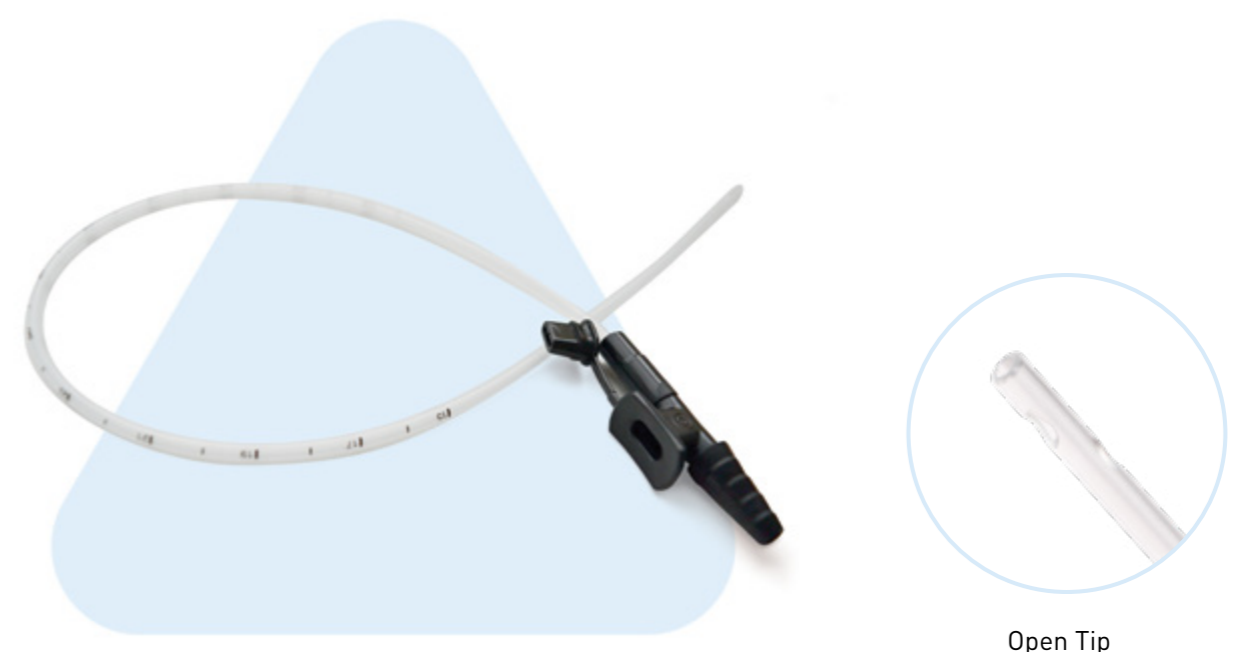

We know from experience that by observing, listening and collaborating with the right people we can find performance breakthroughs with the potential to transform how you work.

Suction Catheters Open Tip (Finger Control with Cap)

Designed for easy passage through endotracheal and tracheostomy tubing, our range of Open Tip Catheter with Finger Control and Cap is available in a variety of sizes and offers an open distal end with an elliptical eye for easy and effective suctioning.

- ⊗ Stepped connector
- ⊗ Transparent tubing
- ⊗ Colour coded
- ⊗ Available in a range of sizes
- ⊗ Finger control with cap

Open Tip

Suction Catheters

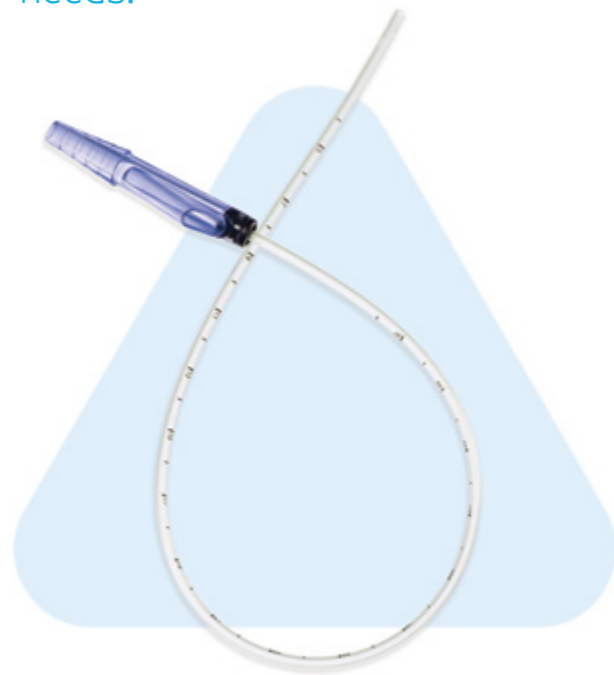

Designed to optimise passage through endotracheal and tracheostomy tubes, with minimal irritation to patients, our suction catheters support efficient airway management removing respiratory secretions, preventing plugging and assisting in effective maintenance of the airway.

Where confidence meets care.

Our focus is on making performance effortless, leaving you free to focus on what matters most – caring for patients.

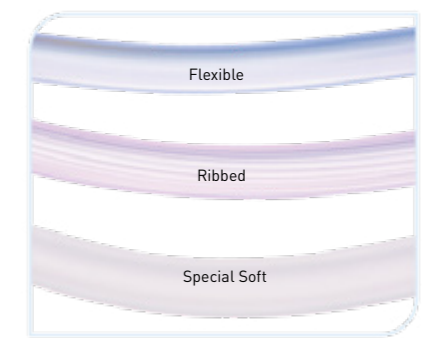

Suction Tubing (Sterile)

Our sterile Suction Tubing is available in flexible, ribbed and special soft versions and comes in a variety of lengths. Each tube comes with standard hexangular connectors attached.

This product is well suited for surgical use.

- ⊗ Flexible, ribbed and special soft tubing options
- ⊗ Choice of tubing lengths
- ⊗ Hexangular connects
- ⊗ Kink and crush resistant tubing that maintain lumen patency
- ⊗ Securely packaged with double wrap
- ⊗ Single use, sterile and ready to use

Independent testing exceeds minimum requirements for suction tubing degree of collapse as per AS 2120.3 Clauses 5.2.2

Suction Tubing

Our transparent Suction Tubing is designed to prevent kinking and crushing of tube walls whilst maintaining lumen patency.

Suction Tubing (Non-Sterile)

Our non-sterile Suction Tubing is available in flexible, ribbed and special soft versions and comes in a variety of lengths. Each tube comes with standard hexangular connectors attached.

This product is well-suited for use in non-sterile environments such as wards.

- ⊙ Flexible, ribbed and special soft tubing options
- ⊙ Hexangular connects
- ⊙ Kink and crush resistant tubing that maintain lumen patency
- ⊙ Variable lengths

Independent testing exceeds minimum requirements for suction tubing degree of collapse as per AS 2120.3 Clauses 5.2.2

We believe
in effortless
performance.

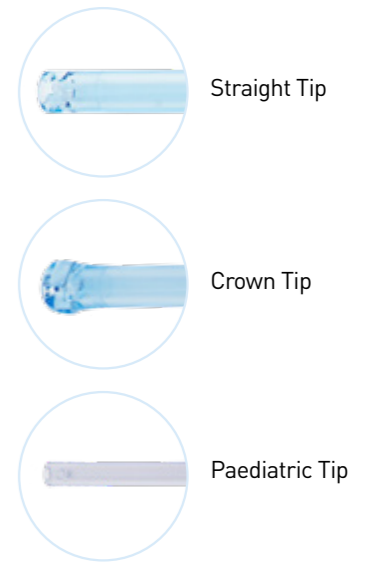

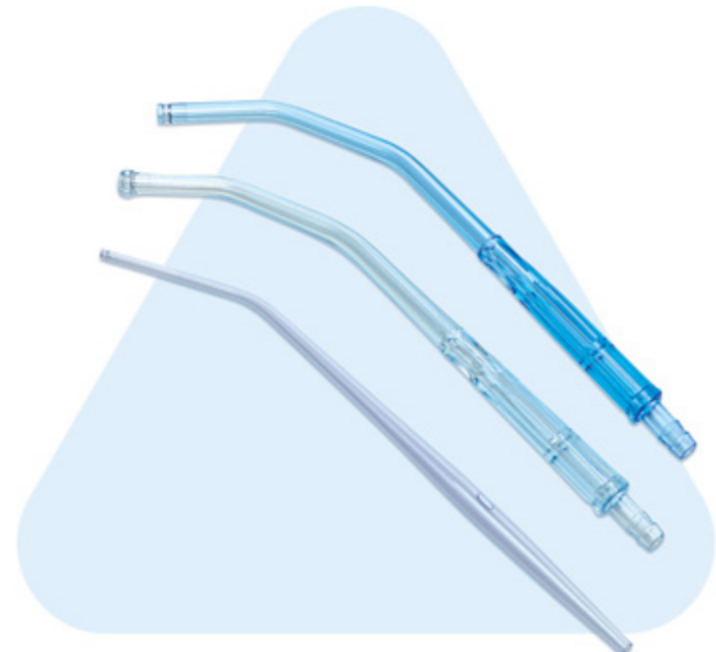

By understanding your clinical needs, we've been able to design and develop reliable, high-quality solutions that work effortlessly with your standard of care.

Yankauer Handles

Our Yankauer Handles are available with straight and crown tips and with and without vents and with an on/off switch. Each comes with a step connector end to ensure a firm connection to any standard suction tubing. They are also available as standard and double wrapped versions.

- ⊗ Smooth and clean edges for atraumatic suctioning
- ⊗ Stepped connectors
- ⊗ Vented and unvented options
- ⊗ Straight and crown tip options
- ⊗ Double wrapped options
- ⊗ Transparent
- ⊗ Paediatric and adult versions

Yankauer Handles

Designed to allow effective suction without damage to surrounding tissue our Yankauer Handles simply and reliably remove pharyngeal secretions. A transparent handle permits visual monitoring of suction fluids.
