Intravenous Administration Products

m|devices®

We believe in effortless performance, so you can focus on caregiving.

One size never fits all. For over a decade we've been designing and manufacturing devices that simplify the roles of clinicians and carers – not just cut to a standard specification but tailored to the unique needs of Australians.

Our focus is on making performance effortless, leaving you free to focus on what matters most – caring for patients.

Leading by Design is a philosophy that reflects our commitment to research and collaboration. A crucial part of our success has been our effort to embed medical professionals in the design process. Their insight helps inform solutions that make the giving of care simple and rewarding.

The problems you face today are the solutions we're working towards for tomorrow.

VENOUS
ACCESS

Safe, reliable,
tailored solutions

Our primary aim is to empower you with simple to use, reliable, well considered products that allow you to safely and efficiently gain venous access and deliver intravenous therapies to your patients.

Our products and services are driven by infection control principles and placing patient and staff safety at the forefront of our thinking and approach.

IV Lines

Our administration and transfusion sets offer multiple configurations, enabling products to be tailored to facilitate the safe and accurate delivery of intravenous therapies across all clinical settings.

Our complementary microbore, minimum volume and standard bore configured extension sets are designed to ensure all your clinical needs can be met.

Infusion Sets

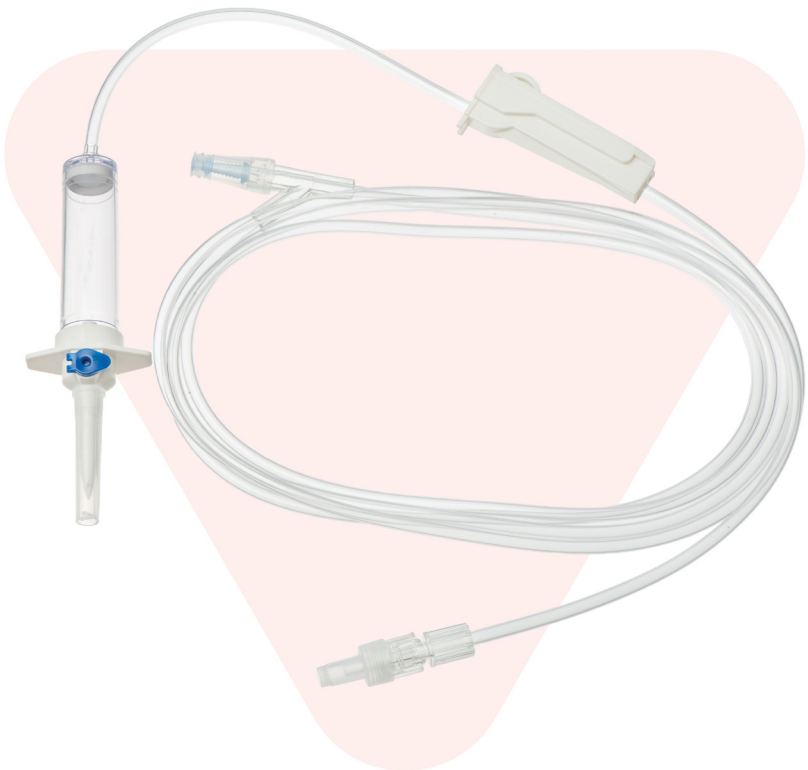

m|devices Infusion Sets include a vented spike attached to a drip chamber with 15µm filter roller regulator to regulate flow.

Access options include: NeutralSite™, injection site or needleless access.

The kink resistant tubing is available at 220cm or 250cm. They also feature a male luer lock with rotating collar, made from medical grade PVC.

The Needleless Access Site option also offers 2 x Non Return Valves.

- ⌕ Intravenous solution set
- ⌕ 15 micron chamber 20 drops per mL
- ⌕ Vented perforator
- ⌕ 3mm tubing diameter
- ⌕ Male Luer lock with rotating collar
- ⌕ 220cm or 250cm tube length
- ⌕ Non Return Valve option available
- ⌕ Peel open pouch

Burette Sets

Our Burette Sets feature a 150mL capacity chamber for accurate dosing and a floating safety shut-off valve automatically seals the chamber at the end of infusion, preventing air from entering the line.

A vented spike perforator ensures consistent flow of fluids from the IV bag, while a swabable needleless access site on top of the Burette allows for safe and convenient medical addition.

The roller regulator provides precise control over the infusion rate.

- 150mL chamber and shut off valve
- Vented perforator

Designed for medical professionals, by medical professionals.

We know from experience that by observing, listening and collaborating with the right people we can find performance breakthroughs with the potential to transform how you work.

IV Accessories

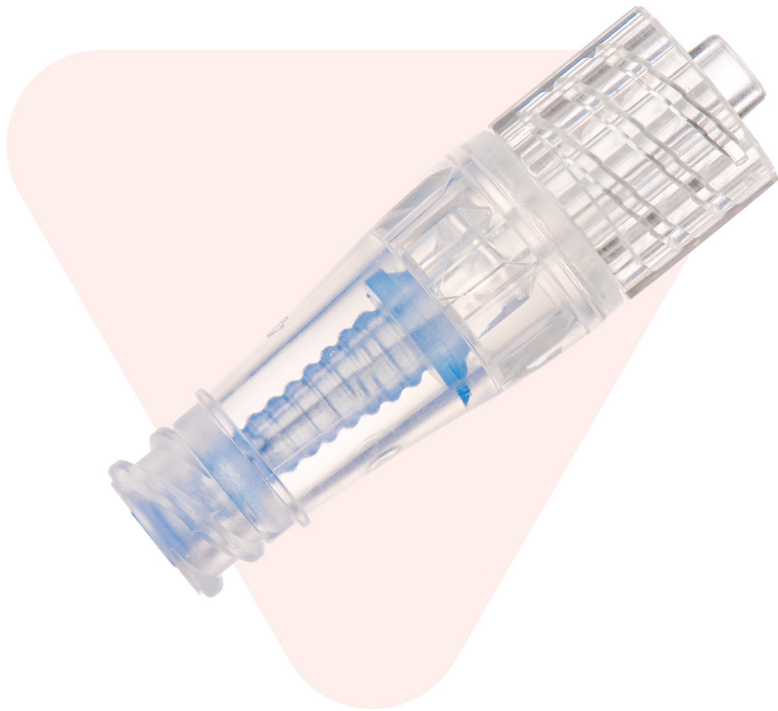

Our range of IV accessories play a supporting role to our IV line portfolio, assisting you in achieving and maintaining venous access.

They are designed to facilitate the delivery of intravenous therapies whilst ensuring the safety of the care giver and patient.

NeutralSite™

Our NeutralSite™ valve helps to prevent catheter occlusions by reducing blood reflux upon disconnection, in addition to preventing catheter related blood stream infections (CRBSI). Its flat swabable pre-slit septum allows for easy disinfection. In addition, the internal straight fluid pathway helps to minimise the priming volume and address dead space concerns. The NeutralSite™ is recommended for use up to 7 days.

- ⌕ Flat swabable pre-slit septum
- ⌕ Straight internal fluid pathway
- ⌕ Low priming volume
- ⌕ Gapless space between septum and casing providing a microbial barrier against contamination
- ⌕ Lipid resistant and free of
- ⌕ Latex and DEHP
- ⌕ Transparent housing for clear visibility
- ⌕ Compatible with luer lock and luer slip connectors

NeutralSite™		STERILE
RE-ORDER	DESCRIPTION	CARTON QTY
IV200005	NeutralSite™	100

LuerSite Valve

The LuerSite is designed for use with Luer lock and Luer slip connectors. One small push ensures a firm connection even with Luer slip syringes. A closed silicone diaphragm stops flow until mechanically opened with a Luer device. LuerSite allows for bi-directional flow of up to 345mL/min upon actuation.

It is designed to ensure a low priming volume of 0.14mL and a pressure rating of 45Psi.

- ⌢ Easy, multiple access with either Luer lock or Luer slip connectors
- ⌢ Low priming volume
- ⌢ Lipid resistant and free of Latex and DEHP
- ⌢ Transparent for clear visibility

RE-ORDER	DESCRIPTION	COLOUR	CARTON QTY
IV200001	LuerSite Valve - Needleless Access Site	Green	50

Luer Activated Valve

Our Luer Activated Valve features a closed silicone diaphragm that checks flow until mechanically opened with a luer device. It allows for bi-directional flow of up to 400mL/min upon actuation.

It is designed for use with luer lock and luer slip connectors. One small push ensures a firm connection also with luer slip syringes. Its design ensures a low priming volume of 0.12mL and a pressure rating of 45 Psi.

- ⌢ Easy multiple access with either luer slip or luer lock syringes
- ⌢ No twist necessary for luer slip connection
- ⌢ Low priming volume
- ⌢ Lipid resistant and free of Latex and DEHP
- ⌢ Transparent housing for clear visibility

Luer Activated Valve			STERILE
RE-ORDER	DESCRIPTION	COLOUR	CARTON QTY
IV200000	Luer Activated Valve - Needleless Access Site	Blue	50

Swabable Needleless Access Site

The swabable, split septum, access site is needle free and the lipid resistant valve offers high flow rates of up to 550mL/min and can support up to 300 access events for both fluid injection and fluid aspiration.

It is Luer activated and designed for use with Luer lock and Luer slip connectors. No additional devices are required for activation and a small twist is all that is required to ensure a firm connection even with Luer slip syringes.

- ⌢ High flow rates
- ⌢ Easy, multiple access with either Luer lock or Luer slip connectors
- ⌢ Low priming volume
- ⌢ Lipid resistant and free of Latex and DEHP
- ⌢ Transparent for clear visibility

Vented Spike Adaptor

Designed for safe and efficient fluid transfer, the m|devices Vented Spike Adaptor enables the transfer of fluids from bags, vials or bottles without the need for needles. The needle-free access site minimises the risk of needle stick injuries, promoting user safety.

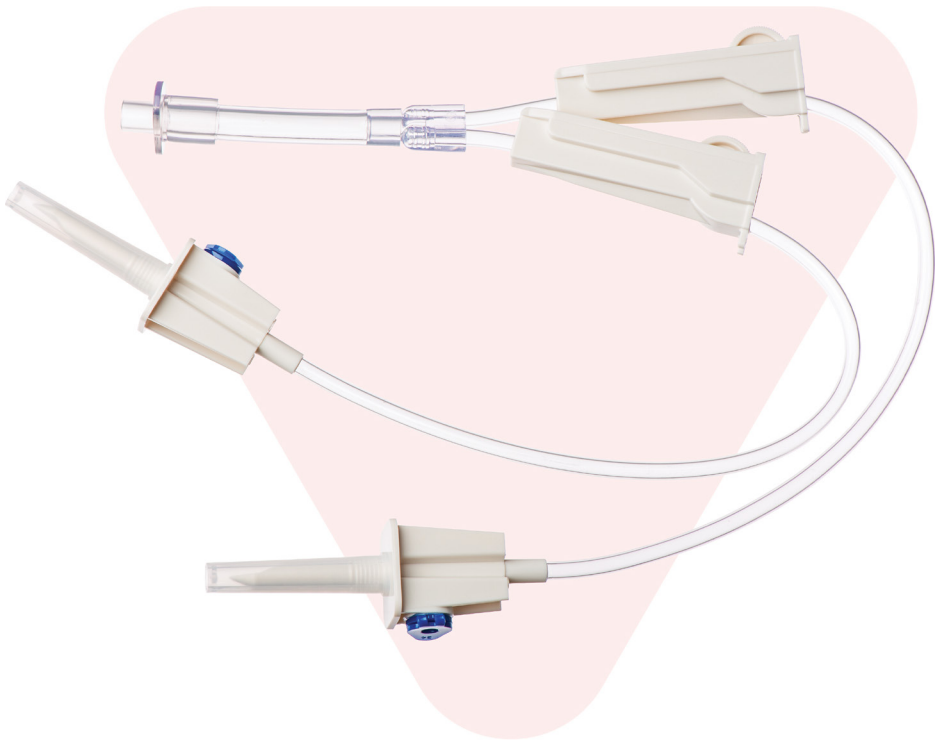

- ⌕ Vented spike
- ⌕ Standard bore tubing
- ⌕ 100mm in length
- ⌕ Click clamp
- ⌕ Needleless access site

Vented Double Spike Adaptor

Our 30cm Vented Double Spike Adaptor is designed with two vented spikes, two roller regulators and a sealed septum connector.

- ⌕ Allows adaption from single bag to double bag
- ⌕ Incorporates a sealed septum
- ⌕ 30cm length
- ⌕ Free from latex
- ⌕ Made from medical grade, non-toxic PVC

Evolving with your needs.

To deliver on our commitment to make life easier for clinicians, we're constantly developing our offering, taking advantage of the latest technologies and industry best practice.

Insulin Syringes

Our disposable 1 mL and 0.5mL syringes have fixed needles and are available in two needle lengths: 8mm and 13mm and are offered in 27G, 29G and 30G.

- ⤵ Orange cap for easy identification
- ⤵ Pre-attached needle
- ⤵ Clear barrel
- ⤵ Bold scale markings

Syringes

From our hypodermic syringes through to our retractable safety syringe range, we have a solution for all your clinical practice needs.

Our retractable safety syringes were designed with infection control principles in mind. The unique and simplistic activation of the safety mechanism is designed to not compromise the clinical task whilst maximising protection for users.

Retractable Insulin Syringes

Our disposable 1 mL and 0.5mL syringes have fixed needles and are available in two needle lengths: 8mm and 13mm and are offered in 27G, 29G and 30G.

The retractable safety syringe version retracts the needle into the barrel after injection to prevent re-use and needle stick injury.

- Orange cap for easy identification
 - Pre-attached needle
 - Clear barrel
 - Bold scale markings
- The retractable syringe:**
- Permanently disabled needle reduces risk of needle stick injury
 - Eliminates blood splatter
 - Audible lock
 - Snap off plunger
 - Sharps waste reduction

Luer Slip Syringe without Needle

The m|devices Luer Slip Syringes without Needle are intended to draw-up measured medication/solution to be delivered to patients and for the aspiration of fluids from vials, ampoules and parts of the body below the surface of the skin.

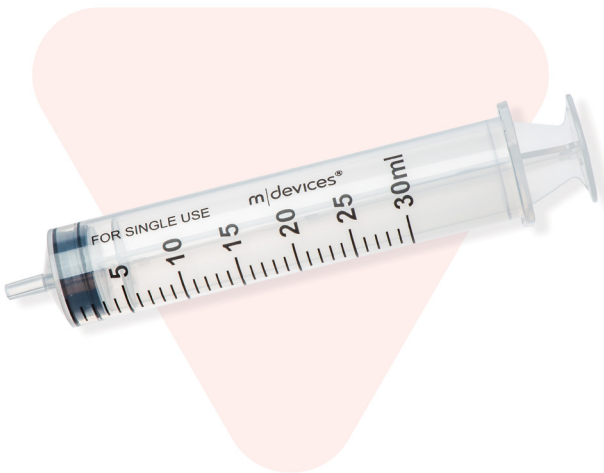

This range of syringes comes in a variety sizes from 1mL through to 60mL.

They feature a highly transparent barrel with clear, high-contrast graduation, which supports effortless reading and precise dosing.

The conical shaped plunger stopper, with double sealing ring, assists with controlled aspiration and injection and allows easy elimination of air bubbles.

They also features a retaining ring to prevent accidental plunger withdrawal from the barrel.

- Conical shaped plunger stopper to assist with eliminating air bubbles from the syringe
- Highly transparent barrel with high contrast incremental measurement markings
- Double sealing ring for controlled aspiration
- Wide variety of sizes available to meet all clinical requirements

Where confidence meets care.

Our focus is on making performance effortless, leaving you free to focus on what matters most – caring for patients.

Insulin Pen Needles

We understand the importance of selecting the correct Insulin Pen Needle for your patient’s needs.

Our products use the latest technology and design to provide the most comfortable injection experience.

Insulin Pen Needles

Our Insulin Pen Needles consist of: a needle holder, needle tube, tip sheath and needle seat sheath. Available in a range of gauges and lengths.

This product can be used with the following brands of insulin pens: Novopen, Wanbangpen, Prandilin, HumaPen, Gansulinpen and KlikSTAR.

- ⌕ Colour coded for easy size identification
- ⌕ Gauge range from 29G - 32G
- ⌕ Free from latex and DEHP
- ⌕ Lengths range from 4mm - 12.7mm
- ⌕ Sterile EO
- ⌕ Compatible with various popular brands of insulin pens

Insulin Pen Needles 5 Bevel

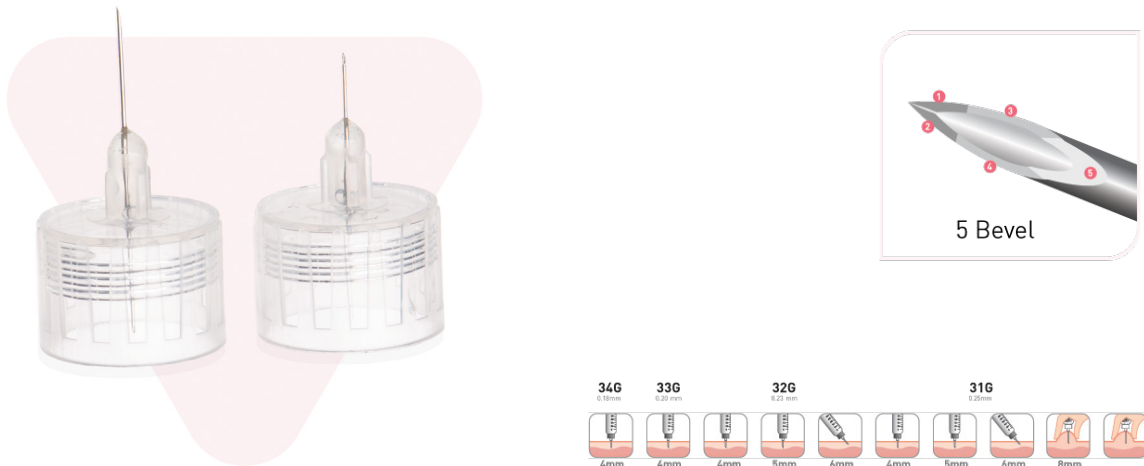

m|devices Insulin Pen Needles 5 Bevel have been designed with super fine needle to provide a more comfortable injection experience.

The silicone lubricated coating on our 5 bevel Insulin Pen Needles provides optimal perforation and penetration. Their thin wall technology means less pressing force is required and reduced injection discomfort. It also dramatically reduces the risk of insulin leakage.

They are available in a range of gauges and lengths to support your clinical requirements.

Our Insulin Pen Needles consist of seal, needle hub, Needle tube, needle shield and needle container.

- ⌢ Sterile packaging
- ⌢ Lubricated needle for a smooth injection
- ⌢ Gauge range: 31-34G
- ⌢ Needle bevel: 3
- ⌢ Needle Lengths available: 4mm, 5mm, 6mm and 8mm
- ⌢ Compatible with various popular brands of insulin pens, refer to IFU for complete listing.

Dual Safety Insulin Pen Needles

Our Dual Safety Insulin Pen Needles provide safety and comfort through their advanced technology.

The user is protected from accidental needlestick by the automatic safety shields, which activate at both ends, after injection.

The broad shield diameter offers great comfort by reducing pressure on the skin and facilitating penetration.

The mdevices Dual Safety Insulin Pen Needles fit a broad variety of pens including; Sanofi Aventis, Lilly, Novo Nordisk, Owen Mumford and Berlin Chemie.

A choice of needle gauges (30G and 31G) and needle lengths (4mm, 5mm, 6mm and 8mm) are available and are coloured coded for easy identification.

- ⌢ Dual automatic shield lock for safety
- ⌢ Less resistance during needle penetration
- ⌢ Lubricated needle for a smooth injection
- ⌢ Several needle gauges and sizes available
- ⌢ Compatible with a broad variety of insulin pens
- ⌢ Packaged in a sealed sterility barrier

Triple Safety Insulin Pen Needles

Our Triple Safety Insulin Pen Needles provide safety and comfort through their advanced technology.

The triple safety shield design helps to protect the user from needlestick injury.

Automatic safety shields activate at both ends after injection, plus this range features of a pre-covered needle tip which provides an extra level of protection.

The broad shield diameter offers great comfort by reducing pressure on the skin and facilitating penetration.

The mdevices Triple Safety Insulin Pen Needles fit a broad variety of pens including; Sanofi Aventis, Lilly, Novo Nordisk, Owen Mumford and Berlin Chemie.

A choice of needle gauges (30G and 31G) and needle lengths (4mm, 5mm, 6mm and 8mm) are available and are coloured coded for easy identification.

- ⌢ Dual automatic shield lock for safety
- ⌢ Pre-covered needle tip as additional safety feature
- ⌢ Safety indicator is revealed once mechanism is activated
- ⌢ Less resistance during needle penetration
- ⌢ Lubricated needle for a smooth injection
- ⌢ Several needle gauges and sizes available
- ⌢ Compatible with a broad variety of insulin pens
- ⌢ Packaged in a sealed sterility barrier
