

Capnography Cut-Down Masks

Our Capnography Cut-Down Masks are adult size and elongated shape for maximum comfort. They feature 3m star lumen oxygen tubing and a 10cm extension CO2 sample line outlet.

Several configurations are available in this range, with options including a 0.2micron hydrophobic filter and/or 3m CO2 sample line.

The unique cut-down mask has been designed for use in opthalmic surgery and any other procedures requiring further access to the face.

- ⊗ Cut-Down design for use in surgeries that require improved access to face
- ⊗ Contoured and comfortable to wear
- ⊗ Adjustable strap
- ⊗ Kink resistant star lumen tubing
- ⊗ Elongated mask shape to suit adult face shapes
