

Luer Slip Syringe without Needle

The m|devices Luer Slip Syringes without Needle are intended to draw-up measured medication/solution to be delivered to patients and for the aspiration of fluids from vials, ampoules and parts of the body below the surface of the skin.

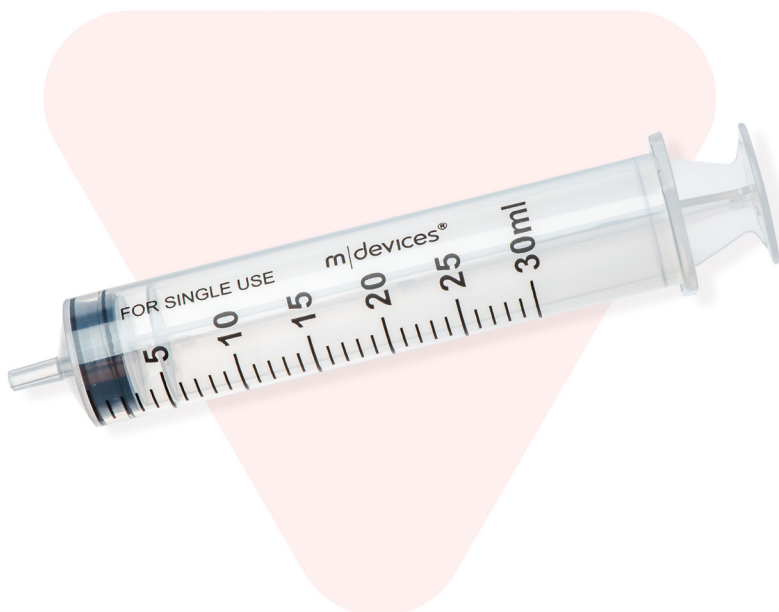

This range of syringes comes in a variety of sizes from 1 mL through to 60mL.

They feature a highly transparent barrel with clear, high-contrast graduation, which supports effortless reading and precise dosing.

The conical shaped plunger stopper, with double sealing ring, assists with controlled aspiration and injection and allows easy elimination of air bubbles.

They also features a retaining ring to prevent accidental plunger withdrawal from the barrel.

- ③ Conical shaped plunger stopper to assist with eliminating air bubbles from the syringe
- ③ Highly transparent barrel with high contrast incremental measurement markings
- ③ Double sealing ring for controlled aspiration
- ③ Wide variety of sizes available to meet all clinical requirements
