

Cervical Dilating Balloon and Securement Device

Our Cervical Dilating Balloon provides a non-prescriptive alternative for midwives and obstetricians to ripen the cervix, pre-labour.

It has been designed in collaboration with clinicians and features a single balloon to improve patient comfort and the absence of eyelets creates a closed system to reduce infection risk.

- ⊗ Specifically designed to ripen the cervix
- ⊗ Single Balloon which can hold up to 80mL
- ⊗ Avoids pharmaceutically activated hyper-stimulation
- ⊗ Non-prescriptive alternative which is easy to insert
- ⊗ Readily removable throughout the process
- ⊗ Optional Securement Device available
- ⊗ High contrast position markings
- ⊗ Batch tracking sticker on packaging
- ⊗ Latex free

Optional Securement Device
(sold separately)
