

Urine Bags

The m|devices 2500mL hospital Urine Bag is designed to meet clinicians' needs with an integrated reinforced double hanger, rope hanger and a bed sheet clamp to secure the bag. The 120cm tube length has an integrated needleless sampling port. The distal tube end, beneath the bag, has a T-Tap and it also features an integrated anti-reflux valve.

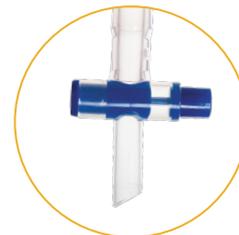

- ⊗ 2500mL Bag
- ⊗ Multiple securement options; integrated hanger, rope hanger and bedsheet clamp
- ⊗ 120cm tubing with needleless sampling port
- ⊗ T-Tap with protective housing to minimise infection
- ⊗ Anti-reflux valve to prevent backflow to reduce infection
- ⊗ Clear incremental measurement markings
