

Open-Ended 2-Way Foley Catheters

With its open-ended design and bilateral eyelets this Open Ended Foley Catheter is designed to deliver the high flow rates for urine drainage necessary to support patients with a strong tendency for catheter blockages.

It features clear measurements to support catheter placement.

- ⊗ Incremental markings to support catheter placement
- ⊗ 100% Silicone
- ⊗ Short tip to reduce bladder irritation
- ⊗ Open ended with two bilateral eyelets to improve flow
- ⊗ Suitable for both males and females
- ⊗ Symmetrical balloon ensures reliable positioning
- ⊗ Intended for Urethral and SPC use
- ⊗ Long indwelling time of up to 8 weeks*
- ⊗ Colour coded for easy size identification
- ⊗ Radiopaque
