IV030001 - IV030004 Transfusion Pump Set

DESCRIPTION

m|devices Transfusion Pump Set is designed for use to deliver blood, blood products and fluid from the bag/bottle into the patient's vascular system via a catheter. The set incorporates a hand pump that can be used to manually pump/push fluid into the patient at the discretion of the user, often when blood/fluid needs to be delivered quickly or at interval speeds.

The below steps are only a suggestion and the use of this product should be only by a qualified clinician.

FOR USE BY A QUALIFIED CLINICIAN. THE BELOW IS ONLY A SUGGESTION AND FACILITY PROTOCOL MUST BE FOLLOWED FOR ALL CLINICAL PROCEDURES WHERE THIS PRODUCT IS USED.

CAUTION

- · Single use.
- DO NOT re-sterilise.
- DO NOT store at extreme temperatures and humidity, avoid direct sunlight.
- STERILE (EO), DO NOT use if the package or product has been damaged or contaminated.
- . EU Notice: any serious incident that has occurred in relation to the device should be reported to the manufacture and the competent authority of the Member State in which the user and /or patient is established.

STEPS

- 1. Close roller regulator.
- 2. Remove protective cap from spike and insert into fluid container (if using a rigid container, open vent on spike).
- 3. Suspend container.
- 4. Squeeze lower half of the drip chamber until half full.
- 5. To prime line, open the roller regulator and invert both the trauma pump and Needleless Access Site(s) until all air is expelled from the line to the luer connector.
- 6. Close roller regulator.
- 7. Remove protective cap from male luer lock connector.
- 8. Connect and secure by inserting male luer lock connector into access device and engaging rotating collar.
- 9. Control flow rate with roller regulator.

USING THE NEEDLELESS ACCESS SITE

- 1. Swab access site with antiseptic before use.
- 2. Connect a luer slip or luer lock connector to the access site by pushing straight into the access site, whilst using a clockwise rotating motion.
- 3. When disconnecting, always hold the housing of the Needleless Access Site to prevent disconnection from
- 4. Repeat above steps each time the Needleless Access Site is accessed.

PRECAUTIONS

- Do not use a needle or blunt cannula with the Needleless Access Site.
- The security of all connections should be checked once established and monitored during use to prevent disconnection.
