

Anaesthetic Masks

DESCRIPTION

The m|devices anaesthetic masks are colour coded for easy identification. These masks are made from transparent, non-toxic, soft PVC. The soft facial cushion provides an optimum air seal with the patient's face and the one-way valve supports efficient and easy inflation and deflation. The masks are for single use and are available in a range of Adult, Paediatric and Infant sizes. Children's masks are sweetly scented to promote calm and ease fear and anxiety.

FEATURES & BENEFITS
